

Dr. Mortazavi, and his staff, Valley Pain Specialists, PC are incredible. When I first went to them for my back issues, I received compassion, respect, concern, smiles, questions answered, and total commitment to my problem.

After going through a series of injections to relieve the inflammation; another procedure followed. I received a total pain relief at that time. When I inquired if the pain returns may I return to this office, they told me I was on their patient records and could call at any time.

Unfortunately, after 4 years my pain did return. I have undergone another series of injections, which alleviated the inflammation; but, I have now been referred to a neurosurgeon.

Dr. Mortazavi and his staff were forthcoming in guiding me to another form of care. They're totally committed to their patient's.

With heartfelt gratitude, I thank him for the care given to me.
